

SRIKANTH B S

Senior Backend Developer (Python · Django · FastAPI) | AI & LLM Automation Architect | Engineering Leader

srikanth974213@gmail.com · +91 79756 37082 · Shimoga, Karnataka, India

linkedin.com/in/srikanth-b-s-a9a567151 · github.com/SRI421 · Portfolio: sri421.github.io/srikanthbs

PROFESSIONAL SUMMARY

Award-winning Full Stack Software Engineer with 6+ years architecting and deploying production-grade AI-driven platforms. Recently shipped two end-to-end **LLM automation products**: an **intent-analysis engine** that converts e-commerce customer-support conversations into reusable service playbooks (triggers, templates, decision trees), and a **self-updating RAG knowledge wiki** with grounded Q&A over company documents. Deep expertise spanning GenAI and agentic AI systems (LangChain, LangGraph, MCP), durable workflow orchestration, secure API development (OAuth2, pytest-driven testing), cloud-native Azure architecture, and React front-ends. Seeking Senior Software Engineer / AI Engineer / Backend Engineer roles focused on architecture, mentorship, and technical leadership.

Core Competencies: Python Backend (Django, Django REST Framework, FastAPI), Secure Coding & OAuth2, Unit Testing (pytest), SQLAlchemy + Alembic, PostgreSQL, Azure Cloud, CI/CD & DevOps, Docker & Kubernetes, Generative AI (GenAI) & LLM Automation, Agentic AI (LangChain, LangGraph, MCP), RAG Pipelines, Workflow Orchestration (Temporal, Celery), Microservices & System Design, Technical Leadership

Key Metrics: 14+ complex projects from ideation to production · 2 LLM automation platforms shipped end-to-end · \$2M+ revenue impact via automation · Up to 45% performance gains · 10+ engineers mentored

PROFESSIONAL EXPERIENCE

Project Lead & Senior Software Engineer — Perfecter.ai

May 2024 – Present | Remote

AI-powered automation platform

Flagship: Intent Analysis Automation — e-commerce support intelligence

Sep 2025 – Feb 2026 · 6 months

- Architected an end-to-end platform that ingests **incoming & outgoing support-ticket messages** and classifies each for **intent and response type** using vector embeddings + **Gemini 3.1 Pro** LLM calls.
- Designed the analysis layer that auto-generates a reusable **service playbook** — **triggers** (when to act), **response templates** (what to send), and **decision trees** (which process path per intent × response type) — versioned in PostgreSQL as a reference for any customer-service team.
- Orchestrated ingest → normalize → embed → classify → aggregate as **durable Temporal workflows** (automatic retries, fault-tolerance, replayable history); built the **React analytics dashboard** — intent explorer, template library, decision-tree viewer.

Tech: Python · PostgreSQL · Temporal · Embeddings · Gemini 3.1 Pro · ReactJS

Flagship: Knowledge Wiki + Ask Wiki — docs-to-wiki automation, RAG

Feb 2026 – Present · 7 months

- Built a **multi-tenant knowledge platform**: companies connect their drive via **company OAuth2 logins** and grant a folder; a change tracker automatically syncs document **additions, updates, and deletions**.
- Engineered **Temporal document pipelines** (parse → chunk → embed → generate) that turn every document into a **Wikipedia-style page** — side menus, sections, cross-links — stored in **PostgreSQL + pgvector**.
- Delivered **"Ask Wiki"**: an on-time RAG assistant for support staff — pgvector semantic retrieval + Gemini 3.1 Pro answers grounded strictly in the company's wiki docs, with source citations.

Tech: Python · PostgreSQL + pgvector · Temporal · Embeddings · Gemini 3.1 Pro · OAuth · ReactJS

Leadership & Architecture

- Led an 8+ member engineering team building AI-powered web platforms, setting technical vision and enforcing architectural standards.
- Architected microservices-based systems using Flask + FastAPI and React TypeScript, enabling horizontal scaling to 10,000+ concurrent users.
- Implemented CI/CD pipelines with Azure DevOps, reducing deployment time from 45 minutes to 8 minutes (82% improvement); introduced coding standards and review practices, cutting production defects by 40% and raising automated test coverage to 87% (pytest).

Technical Delivery & Impact

- Designed AI/OCR/NLP document pipelines using GPT-4, Claude APIs, and OpenAI Vision, achieving 94.7% extraction accuracy versus ~78% baseline.
- Migrated monolith to serverless architecture (Azure Functions, Cosmos DB), lowering infrastructure costs by 60% while achieving 99.99% availability.
- Built event-driven analytics with Event Hub and Stream Analytics, processing 50,000+ events/second with sub-second latency.
- Optimized APIs via Redis caching and database indexing, cutting average response time from 2.8s to 340ms (87% improvement).
- Delivered an AI-driven subrogation platform reducing claim processing from 4 hours to 15 minutes per claim, with automated audit-ready reporting.

Tech: Python 3.11+ · FastAPI · Flask · SQLAlchemy · pytest · OAuth2 · React 18 (TypeScript) · PostgreSQL · Temporal · Azure (App Service, Functions, AKS, Blob Storage, Key Vault, Cosmos DB, Event Hub, DevOps) · Docker · Kubernetes · Redis · LLMs (Gemini, GPT-4, Claude)

Full Stack Developer & Systems Engineer — Gridlogic

Dec 2022 – May 2024 | Remote

FinTech / payment infrastructure

- Designed distributed services for KYC, payments and analytics used by 500+ institutional clients — OAuth2-based authentication & authorization, strict input validation and data-encryption controls across payment flows.
- Improved backend throughput by 3.5x using optimized SQL, async processing, RabbitMQ, Celery + CeleryBeat schedulers, while reducing server costs by 45%.
- Refactored core systems into microservices; built a payment reconciliation engine processing 100,000+ transactions/day with strict ACID guarantees.

- Implemented Redis caching that reduced DB load by 65% and improved API latency by 58%; created data-migration pipelines moving 5TB+ with zero downtime.

Tech: Python 3.9+ · Django 4+ · Django REST Framework · FastAPI · SQLAlchemy + Alembic · Celery + CeleryBeat · RabbitMQ · Redis · PostgreSQL · pytest · Docker · AWS

Product Developer Associate — Benchmark ESG | Gensuite

Mar 2022 – Dec 2022

Enterprise compliance & sustainability reporting SaaS

- Delivered 15+ full-stack features for compliance dashboards supporting a \$2M+ annual revenue pipeline.
- Optimized React frontends with lazy loading and code splitting — bundle size down 52%, load time from 4.2s to 1.8s; built real-time dashboards rendering 100,000+ data points at 60 FPS.
- Automated ESG data-ingestion pipelines using AWS Lambda and S3.

Tech: Python · React.js · AWS (Lambda, S3, CloudWatch) · SQL · ColdFusion · HTML/CSS/JavaScript

Associate Software Engineer — ACT Fibernet

Aug 2021 – Mar 2022

Telecom infrastructure

- Developed internal enterprise tools on the MEAN stack supporting 2,000+ employees; automation reduced manual operational effort by ~40%.

Tech: MongoDB · Express.js · Angular · Node.js

Freelance Full Stack Web Developer

Sep 2019 – Aug 2021

Independent consultant

- Delivered 20+ production web applications for startups and SMBs generating \$50,000+ in billed work, with 98%+ client satisfaction; mentored 3 junior developers.

Tech: Python · React.js · Node.js · PostgreSQL · MongoDB · AWS

IMPACTFUL PROJECTS & ACHIEVEMENTS

LLM Automation Platforms

- **Intent Analysis Automation:** turns e-commerce support-ticket conversations into a reusable playbook of intents, triggers, templates and decision trees — embeddings + Gemini 3.1 Pro on durable Temporal pipelines, with a React analytics dashboard. · *Duration: 6 months, 2025–26*
- **Knowledge Wiki + Ask Wiki:** OAuth2-connected drive folders auto-published as a Wikipedia-style wiki (add/update/delete sync) with a pgvector + LLM RAG assistant answering support questions with citations. · *Duration: 7 months, 2026 – present*

AI & Analytics

- **Malpractice Detection System:** real-time exam proctoring with face verification and head-pose tracking — ~98% accuracy, deployed for 100,000+ students. · *Duration: 8 months, 2020–21*
- **SmartEval App:** automated handwritten answer evaluation using deep learning — 500,000+ scripts processed, 10,000+ grading hours saved; published research paper. · *Duration: 10 months, 2020–21*
- **Intelligent Surveillance:** vision-based person recognition — ~99.2% accuracy across 50+ secure facilities. · *Duration: 6 months, 2021*
- **Realtime Pothole Detection:** computer vision + GPS mapping with automated alerts integrated into municipal workflows. · *Duration: 4 months, 2019–20*

Architecture & Infrastructure

- **Enterprise Dashboard Platform:** cloud-based payment and analytics suite — 99.9% uptime, 10,000+ concurrent users. · *Duration: 10 months, 2023–24*
- **Document Processing Pipeline:** insurance-focused intelligent extraction — 94.7% accuracy, 50,000+ documents/month. · *Duration: 8 months, 2024–25*
- **Microservices Migration:** monolith → containerized microservices — deployment time down 70%, throughput tripled. · *Duration: 5 months, 2025*

Awards & Recognition

- Best Project (2020–21, university-level) · Certificate of Excellence (B.E. CS, Ramaiah Institute) · Topper Medal (Polytechnic) · Peer-reviewed SmartEval AI/NLP paper.

TECHNICAL SKILLS

AI / LLM & Data: Generative AI (GenAI), Agentic AI & AI Agents (LangChain, LangGraph, Model Context Protocol - MCP), LLM integrations (Gemini 3.1 Pro, GPT-4, Claude), RAG pipelines, Embeddings & semantic search (pgvector), Prompt engineering, Temporal workflow orchestration, Machine Learning (TensorFlow, PyTorch, Scikit-learn), NLP, Computer Vision (OpenCV, YOLO)

Backend & Security: REST API design, OAuth2 authentication & authorization, JWT, secure coding (input validation, data encryption, OWASP mitigation), unit testing (pytest), SQLAlchemy + Alembic (ORM & migrations), Celery + CeleryBeat/RedBeat scheduling, systems integration, end-user support

Languages & Frameworks: Python 3.11+, Django 4+, Django REST Framework (DRF), FastAPI, Flask, JavaScript, TypeScript, React 18+ (Hooks, Context, Redux), Node.js, Java, C++, HTML5, CSS3

Cloud & DevOps: Azure (App Service, Functions, AKS, Container Apps, Blob Storage, Key Vault, Cosmos DB, Event Hub, DevOps), AWS (Lambda, S3, EC2, RDS), Docker, docker-compose, Kubernetes, CI/CD (Azure DevOps, GitHub Actions), Git (GitHub, Azure DevOps), Terraform, Microservices, Serverless

Databases & Messaging: PostgreSQL (indexing, query tuning, window functions), Advanced SQL & NoSQL, pgvector, MongoDB, Redis, RabbitMQ, Cosmos DB

Leadership: Agile/Scrum, Architectural decision-making, Technical mentorship, Distributed & multicultural team collaboration, End-user support, Code reviews, Technical documentation, Tools: VS Code, Visual Studio

EDUCATION & CERTIFICATIONS

B.E. — Computer Science, Ramaiah Institute of Technology · CGPA 7.82 (Distinction)

2018 – 2021

Diploma — Computer Science, D S Dinakar National Polytechnic · 90.30% (Topper Medal)

2015 – 2018

- Certifications: NPTEL – Python DSA (Top 10%) · Microfocus – Docker & Containers (Advanced) · Flask, Django, ReactJS, MongoDB, Java, SQL · SmartEval research paper (peer-reviewed publication).
